### **SUBJECT: SCIENCE**

To make learning fun and interactive, you are requested to visit your nearby locality and collect relevant data as per the questions asked. As conscious citizens of this world, we are aware of the long term implications of overuse of ACs, refrigerators etc. So, You are needed to check the consumption of the electricity from various electrical gadgets. Compare them and realise what is better for usage.

### **INTERACTIVE PROJECT**

1. Survey the area in your locality, and make a comparison of five different electronics items, on the basis of their Star rating power consumption.

Name of the items	Star rating	Power consumption in a month	Rated wattage

2. If your appliances are made up of iron like coolers etc., how the atmosphere will affect the longevity of these appliances? Explain the effect of the acids, gases, and moisture on the metals like:

- a) Iron:
- b) Silver:
- c) Copper:
- d) Magnesium:
- e) Aluminium:
- f) Gold:
- g) Brass:
  - Write the atomic number and atomic weights of the elements mentioned above.
  - Which of the above elements is most reactive and which is the least?
  - What should be done to stop the metals from corrosion? Write at least five methods for the same.

According to a popular translation of the Brahmi script upon the Iron Pillar of Delhi, the pillar was made for a king (presumably of the Gupta period, given the era of its creation). It was also made to honor one of the most important Hindu Gods – Vishnu. However, it is widely believed that the king to which the inscription refers is Chandragupta Vikramaditya.

The pillar has been constructed years back. Why do you think it has not rusted in spite of being kept in an open area? Explain the property which has prevented rusting in this case.

3. Explain the environmental impact of emission of Gases/Chemicals from various devices like Fridge, ACs, etc. being used in day to day use. Nowadays companies are trying to make devices which have least harmful effect on environment and human health. Enlist the improvisations on these devices for fridge and AC. Name the alternative chemicals being used by them and explain how they work and how they are helpful in minimizing the harmful effect.

### **SUBJECT: SOCIAL SCIENCE**

Demonetization is the act of stripping a currency unit of its status as a legal tender, for example: The recent declaration of Rs.500 and Rs.1000 currency notes as invalid in India.

The aim behind the government's action was to combat tax cheating, counterfeiting and corruption. Eliminating large denominations makes it harder to hide large amounts of cash. "To break the grip of corruption and black money, we have decided that the currency notes presently in use will no longer be legal tender from midnight tonight."

# Demonetization

## Objectives of this project will:-

- Help you get a better and deeper understanding of the impacts of this new policy.
- Help you make your own judgement about its merits and demerits.
- To help you keeping up with recent economic developments of the country.

1. How was the process of Demonetization carried out?
2. Analyze the impact of Demonetization on agriculture and Industries.
3. Through Demonetization government and RBI are getting too much of cash in their coffers, in your opinion what should government do with the money it gets through Demonetization.

Demonetization has struck the nation hard in terms of living. Conduct a survey by Interacting with at least 5 people to understand their perspective

Sl.No.	Name of the person	Profession	Impact of Demonetization on the surveyed person	Feedback (positive/negative)	Suggestions given by the surveyed person to improve the system
